ABOUT GRAMONTY

GraMonty is all about the future – our common future – a more sustainable future. Unbreakable glasses are part of that future. We need to change our way of living and consumption by rethinking the way we use plastic and more importantly reuse and reduce plastic.

GraMonty takes this responsibility very seriously and has an urge to contribute to it – taking unbreakable glasses to a new level.

The brand GraMonty was founded by Jesper Gram (Gram) and Morten Moeller (Monty) in Denmark. The idea of producing their own brand of unbreakable glasses to reduce waste and endorse recycling arose, when they realized that there was a need for unbreakable glasses of the highest possible quality.

After several years in the industry for unbreakable glasses, they decided to make their own brand, and that their mission was to live up to the highest standards with a Scandinavian design and a whole

series of glasses that matches one another. GraMonty glasses are designed in Scandinavia with focus on functionality, minimalism and aesthetics and the product GraMonty was founded.

GraMonty takes unbreakable glasses to a new level and hopefully consumers will rethink their demands, when they buy unbreakable glasses and focus not only on reuse, but also on high quality, beauty and functionality.

Jesper and Morten / honored as a “Gazelle” : One of the most continuously and fastest growing companies in the last four years in Denmark.
